

ICN – Examination date: 10-12-2012 – Round 1 – “Sidecar”  
 Available time: 100 minutes.

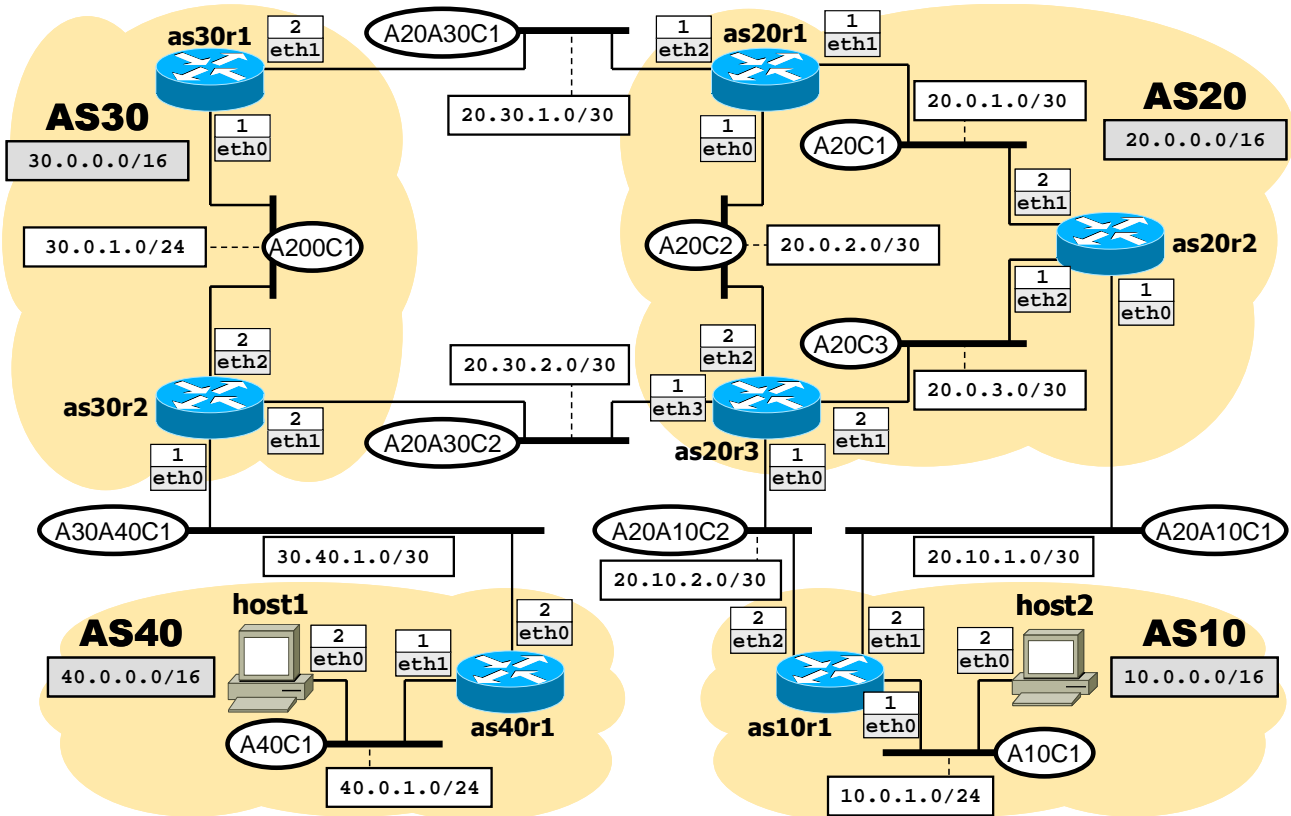

Using Netkit, implement the network depicted in the following figure.

- All the internal networks (in grey) of the ASes must be visible by all BGP routers.
- All the internal networks of the ASes must be reachable from any network nodes.
- Inter-AS peering subnets must be announced in BGP as well.
- No router announces 0/0.
- By altering solely the configuration of **as200r1**, implement the following routing policy:
  - Traffic from **AS200** to **AS100** should favour using link **A100A200C1**.
  - Traffic from **AS100** to **AS200** should favour using link **A100A200C2**.

# II

Using Netkit, implement the network depicted in the following figure.

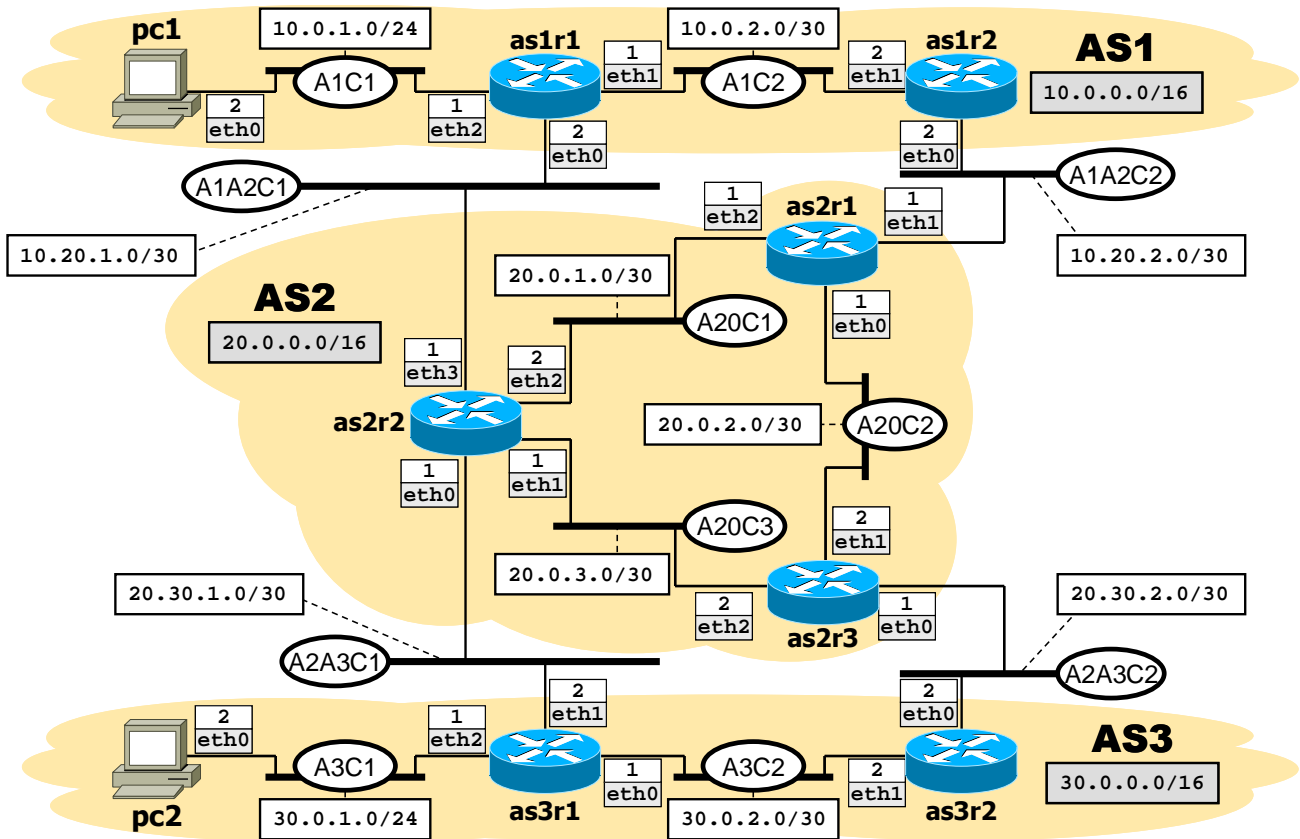

- All the internal networks (in grey) of the ASes must be visible by all BGP routers.
- All the internal networks of the ASes must be reachable from any network nodes.
- Inter-AS peering subnets must be announced in BGP as well.
- No router announces 0/0.
- By altering solely the configuration of `as10r1`, implement the following routing policy:
  - Link `A20A10C1` must be set up as a backup of `A20A10C2` for both inbound and outbound traffic.

ICN – Examination date: 10-12-2012 – Round 2 – “Sandwich”  
 Available time: 100 minutes.

Using Netkit, implement the network depicted in the following figure.

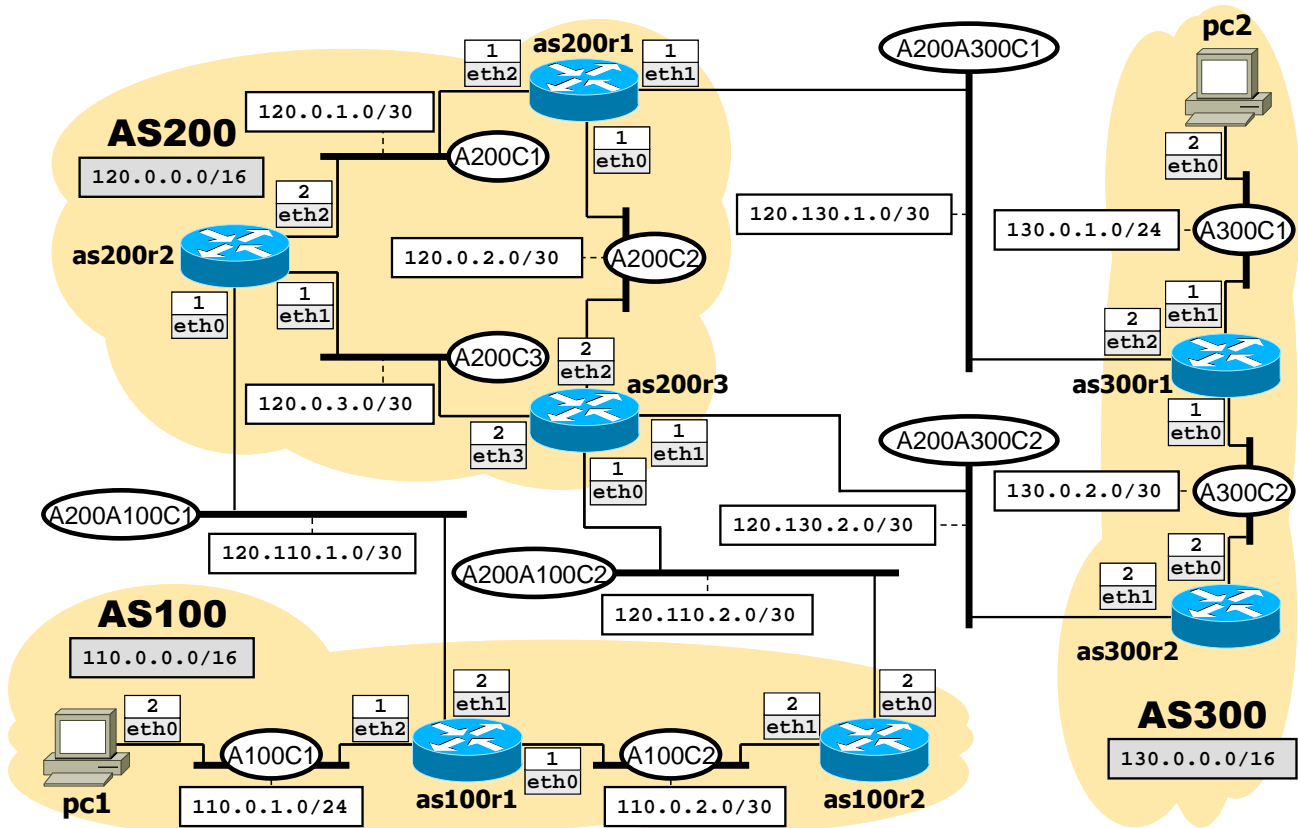

- All the internal networks (in grey) of the ASes must be visible by all BGP routers.
- All the internal networks of the ASes must be reachable from any network nodes.
- Inter-AS peering subnets must be announced in BGP as well.
- No router announces 0/0.
- By altering solely the configuration of as3r2, implement the following routing policy:
  - Traffic from AS3 to AS2 should favour using link A2A3C2.
  - Traffic from AS2 to AS3 should favour using link A2A3C1.

ICN – Examination date: 10-12-2012 – Round 2 – “Eta Beta”  
 Available time: 100 minutes.

Using Netkit, implement the network depicted in the following figure.

- All the internal networks (in grey) of the ASes must be visible by all BGP routers.
- All the internal networks of the ASes must be reachable from any network nodes.
- Inter-AS peering subnets must be announced in BGP as well.
- No router announces `0/0`.
- By altering solely the configuration of `as300r1`, implement the following routing policy:
  - Link `A200A300C1` should be set up as a backup of link `A200A300C2` for both inbound and outbound traffic.
